

ChemTreat's All-In Approach to On-Site Generation of Chlorine Dioxide

- Quality Precursors
- Professional Installation
- Hands-free Neat Delivery & Chemical Transfer
- Standardized Storage & Control Equipment
- Systems Operation & Maintenance
- Complete Program Management
- Annual Safety Reviews & Audits

Solutions-Based Approach

The CD30 Program offers several methods of generation to meet a wide range of customer needs. Each CD30 installation is customized for your specific system.

No Capital Investment

Billing is based on the chlorine dioxide used for your system. ChemTreat retains ownership of the equipment to ensure safety and optimal performance.

Mitigated Risk

Trained ChemTreat specialists manage all aspects CD30, including system design, chemical delivery, and chlorine dioxide generation and application.
